Grades 2-5 non-fiction book^(reference)

Classroom design

One of the main things that are in my classroom design is the classroom library which is made for any of my students that would love to just take a book and read. There are two circular shelving units so that we could separate and fiction. They will be stacked two units high to hold more books but the reason it is only units tall is so that every kid can reach all of the books . It also allows us to separate between different reading levels in the library. There are also chairs for a couple of students so there is a good spot for them to read comfortably. I have also made groups of desks so that students would be closer to each other but not too many students at once.
